Product Overview

Precision-engineered smart feeder for 8x4mm component tape.

High-Precision Component Feeder

This smart feeder is engineered for precision component delivery in automated surface mount technology assembly lines. Designed for 8x4mm tape-and-reel materials, it ensures high-speed, reliable pick-and-place performance. Its intelligent design supports seamless integration with various pick-and-place systems to optimize production throughput and assembly accuracy.

Technical Specifications

Tape Width	8 mm
Component Pitch	4 mm

Compatibility

Supported Machine Series

- Samsung CP Series
- Samsung SM Series
- Samsung SME Series
- Samsung SM IT Series

Available Feeder Options

8x2mm, 8x4mm, 12mm, 16mm, 24mm, 32mm, 44mm, 56mm
