

SMT Pick and Place Nozzle

This SMT pick and place nozzle is designed for use with SAMSUNG CP45 series placement machines. It facilitates reliable component handling and accurate placement during PCB assembly.

Product Overview

High-Precision SMT Pick and Place Nozzle

This high-quality pick and place nozzle is designed for reliable component handling in automated PCB assembly lines. Available in both original and copy versions, these nozzles are engineered for consistent performance and accuracy. They are compatible with various placement machine series to ensure smooth production operations.

Compatibility & Types

Available Nozzle Types

Original, Copy, Blackened

Technical Specifications

Series Configuration Table

Part Series	Outer Diameter (mm)	Inner Diameter (mm)
XF	0.8	0.4
XG	1	0.5
XH	1.4	0.8
XI	2.2	1.4
AA	4	2.4
BA	6.2	4
QE	9	7.5
QF	12.5	10
