Product Overview

Precision SMT Pick and Place Nozzle

This high-quality, newly manufactured pick and place nozzle is designed for precision component handling in surface mount technology assembly lines. Engineered for reliability, these nozzles offer excellent durability and accuracy to ensure consistent placement performance. They are compatible with a wide range of industry-standard pick and place equipment.

Quality and Features

Key Features

New and Original, High Quality, Diamond Tip Available, Precision Engineered

Compatibility

Supported Systems

- YV88X / Xg (EMERALD X/X II)
- YG200 (MG2)
- YG100 (MG1)
- YV86D / YV100D

Part Reference

Available Nozzle Types

Part Number	Description
KV8-M7710-A1X	NOZZLE 71A ASSY
KV8-M7720-A1X	NOZZLE 72A ASSY
K37-M7113-20X	YV86/YV100D DISP. NZ (Solder Paste)
KGT-M7710-A0XD	YG200 NOZZLE 201A ASSY (DIAMOND TIP)
KGS-M7710-A0XD	YG100 NOZZLE 211A ASSY
