

SMT Pick and Place Nozzle CN040 for CP45/CP45FV

This SMT pick and place nozzle is designed for SAMSUNG CP45 and CP45FV machines. The CN040 nozzle ensures reliable component handling and placement in automated electronic assembly processes.

Product Overview

High-Precision SMT Placement Component

This SMT pick and place nozzle is designed for high-accuracy component handling in automated electronic assembly environments. Engineered specifically for compatibility with CP45 and CP45FV series machinery, it ensures reliable and consistent performance during the production process. Constructed from high-durability materials, this nozzle is essential for maintaining optimal efficiency and precision on SMT production lines.

Compatibility

Nozzle Reference Guide

Series	Compatible Models
CP30	M1, M2, M3
CP33	XG05, XH08, XI14, AA24, BA40
CP40	N045, N08, N14, N24, N40, N75
CP45 FV	TN030, TN040, TN065, TN140, TN220, TN400, TN750, TN1100
SM320/CP45 NEO	CN030, CN040, CN065, CN110, CN140, CN220, CN400, CN750, CN1100
CP55	FN050, FN080
CP60	TN045, TN070, TN140

Compatible Machine Series

CP45, CP45FV, SM320, CP45 NEO
