

SMT Pick and Place Nozzle for CP20/CP40 Machines

This SMT pick and place nozzle is designed for use with CP20 and CP40 series machines. It facilitates the accurate pick-up and placement of electronic components.

Product Overview

Precision-engineered nozzle designed for high-speed assembly line performance.

High-Precision SMT Pick and Place Nozzle

This SMT pick and place nozzle is specifically engineered for use with CP20 and CP40 series automated assembly machines. Designed to ensure reliable component handling, it facilitates efficient and accurate pick-up and placement during high-speed SMT assembly processes. These nozzles are available in both original new and high-quality copy variants to suit different maintenance requirements.

Technical Specifications

Nozzle Data Table

Model	Outer Diameter (mm)	Inner Diameter (mm)	Part Number
N045	1.00	0.50	J2101938
N06	0.82	0.52	N/A
N06-C (Carbide)	0.82	0.52	N/A

Machine Compatibility | CP20, CP40
