

SMT Pick and Place Nozzle for CP45

This SMT pick and place nozzle is designed for use with SAMSUNG CP45 placement machines. It facilitates reliable component handling and accurate placement in high-speed SMT assembly processes.

Product Overview

High-Precision SMT Nozzles

These professional-grade pick and place nozzles are engineered specifically for CP45 series placement machines. Available in both original and high-quality copy formats, they ensure consistent component handling and placement accuracy during high-speed SMT assembly. The range includes various sizes designed for diverse component requirements, featuring durable construction for extended service life and optimal production line efficiency.

Compatibility

Supported Machines	CP45, CP45 NEO, CP60
--------------------	----------------------

Nozzle Specifications

Available Nozzle Types

Series	Outer Diameter (mm)	Inner Diameter (mm)
XF	0.8	0.4
XG	1	0.5
XH	1.4	0.8
XI	2.2	1.4
AA	4	2.4
BA	6.2	4
QE	9	7.5
QF	12.5	10
