

SMT Pick and Place Nozzle TN030

This SMT pick and place nozzle is designed for accurate component placement. The TN030 model ensures reliable performance in high-speed SMT assembly processes.

Product Overview

High-Precision SMT Placement Component

This SMT pick and place nozzle is engineered for reliable and accurate component handling during high-speed PCB assembly. Designed for consistency and durability in demanding manufacturing environments, it provides a secure grip to minimize component drop rates. The nozzle is compatible with various automated pick and place systems, helping to maximize production efficiency.

Product Specifications

Model Identifier	TN030
Availability Options	Original, Copy

Technical Dimensions

Dimension Specifications

Component ID	Outer Diameter (mm)	Inner Diameter (mm)
TN030	0.8	0.3
TN045	0.75	0.38
TN070	1.2	0.65
TN140	2.2	1.4
TN220	3.6	2.2
TN400	6.2	4.0
