

SMT Placement Machine Ball Spline

This ball spline is designed for use in SMT placement machines. It is compatible with the YAMAHA YG12 model.

Product Overview

High-Precision Component

This original new ball spline is designed for high-performance surface mount technology (SMT) placement machinery. It serves as a critical spare part to ensure smooth, reliable motion control and positioning accuracy during assembly. Built to strict quality standards, this component is essential for maintaining the operational efficiency and longevity of professional pick-and-place equipment.

Compatibility

Compatible Machine Series	YG12, YV100X, YV100XG, YV100II, YG200X
