

SMT Placement Nozzle for Fuji XP Series

This placement nozzle is designed for use with Fuji XP series SMT machines. It facilitates the accurate and reliable placement of electronic components onto PCBs.

Overview

High-Precision SMT Placement Nozzle

These high-precision placement nozzles are engineered for optimal performance and reliability in automated SMT assembly environments. Designed for secure component handling, they ensure accurate placement of electronic components onto PCBs. Their robust construction is built for extended operational life, making them ideal for high-volume electronic manufacturing processes.

Technical Specifications

Available Nozzle Sizes

- 0.70 mm
- 1.00 mm
- 1.30 mm
- 1.80 mm

Assembly Part Numbers

Part Number	Size
ADEPN-8070	0.70 mm
ADEPN-8080	1.00 mm
ADEPN-8090	1.30 mm
ADEPN-8100	1.80 mm

Compatibility

Compatible Equipment	Fuji XP Series
