

SMT Spline Shaft Assembly for Yamaha YV100II

Spline shaft assembly designed for Yamaha YV100II SMT equipment. It ensures optimal performance and reliability in surface mount technology operations.

Product Overview

High-Precision Spline Shaft Assembly

This spline shaft assembly is a specialized component engineered for compatibility with high-performance SMT machinery. Designed to meet strict original equipment standards, this assembly ensures reliable motion control and precision in surface mount technology operations. It provides an essential maintenance solution to sustain operational efficiency and equipment longevity.

Compatibility & Identification

Part Number	KM1-M710S-A00
Compatible SMT Machinery	YV100II

Quality & Standards

Quality Assurance	Original New, High Quality, Reliable
-------------------	--------------------------------------

Technical Specifications

Included Components

Component Name	Part Number
Housing, Head	KM8-M7101-20X
Piston, Assy	KM1-M7104-A0X
Sensor, Head	KM8-M7160-00X
Motor	90K55-4W035R

Assembly Metrics

1 pcs Piston Assembly Qty	8 pcs Valve (U/D) Qty
-------------------------------------	---------------------------------
