

SMT Standard Shaft for Electronic Assembly Equipment

This is a standard shaft designed for SMT pick-and-place machines. It ensures reliable performance in electronic assembly processes.

Product Overview

Professional SMT Equipment Component

This standard shaft is a high-precision spare part engineered for use in surface mount technology assembly equipment. It is designed to meet strict original equipment specifications, ensuring compatibility and reliable performance during high-speed electronic manufacturing operations. Built for durability, this component is a critical element for maintaining the operational accuracy of SMT assembly lines.

Technical Details

Condition

Original • New

Part Number	KGB-M71S0-50X
-------------	---------------

Manufacturing Origin	Japan
----------------------	-------

Compatibility List

Compatible Belts and Parts

Part Number	Application
KV6-M7144-00X	BELT, R MOTOR
KGS-M9129-00X	BELT 1, CONVEYOR YG100
KGS-M9129-50X	BELT 2, CONVEYOR YG100
KHM-M913J-00X	BELT 1, CONVEYOR YG200L
KV5-M9122-00X	BELT SPLINE
KG7-M9115-00X	BELT, W AXIS
