

# SMT Timing Belt 300-3GT-9 for Yamaha SMT Equipment

This timing belt is designed for use in YAMAHA SMT equipment, specifically models YV100XG, YG12, YS12, and YS24 W Axis. It features a 300-3GT-9 profile.

## Product Overview

### High-Precision SMT Timing Belt

This high-performance timing belt is engineered for precise motion control in demanding SMT assembly environments. Designed with a 3GT tooth profile and 9mm width, it ensures stable and accurate power transmission for various axis movements. The durable construction supports extended operational life and helps maintain the high standards required for automated pick-and-place equipment.
