Product Overview

Precision and Safety Combined

These snipe nose pliers are engineered for precision work in confined spaces, featuring long, tapered jaws perfect for gripping, bending, and cutting. Designed with safety in mind, they include insulated handles suitable for use in sensitive environments. Their durable die-forged construction ensures high strength, wear resistance, and a long service life, making them a reliable tool for professional technicians.

Performance & Safety

Key Benefits

- Suitable for inflammable and explosive environments
- High-leverage design for efficient cutting
- Durable die-forged construction
- Excellent wear resistance

Safety Certifications & Usage

Insulated Handles, Explosion-Proof, High-Temperature Resistant
