

Snow Rubber Track 250 x 72DB x 39

This snow rubber track is designed for use in rotovators and other machinery. It provides excellent grip and traction on snowy and icy surfaces.

Product Overview

Engineered for durability and optimal traction in snowy conditions.

High-Performance Snow Rubber Track

This durable rubber track is specifically engineered for snow applications, offering superior grip and traction on icy and snowy surfaces. With a width of 250mm and a 72mm pitch, it is designed for heavy-duty performance in demanding winter conditions. Its robust construction ensures extended service life and reliability for snow removal equipment and specialized machinery.

Technical Specifications

Constructed from a robust rubber compound for excellent resistance to wear and tear.

Track Dimensions

250 mm

Width

72 mm

Pitch

39 count

Links

Performance Advantages

- Low ground contact pressure
- Reduced ground surface damage
- Low vibration and noise levels
- High tractive force
- Enhanced running speed
- Lightweight design for easy replacement

General Information

Warranty Period

1 year under normal use

Primary Application

Rotovator, Snow Removal Equipment, Winter Machinery
