

Soapstone Welding Pencils

Soapstone pencils are used for marking metal surfaces in welding and metalworking. These pencils create temporary, heat-resistant marks that are easily removable.

Product Overview

Industrial Marking Precision

These soapstone pencils are essential tools for welding and metalworking professionals. Crafted from soft metamorphic rock, they allow for precise, temporary markings on metal surfaces that remain visible during industrial processes. The material is chosen for its excellent heat resistance and ease of removal after the work is complete.

Shape

Cylindrical • Pointed Tip

Technical Specifications

Material Composition	Soapstone (Talc-based metamorphic rock)
Marking Type	Heat Resistant, Temporary, High-Visibility

Application

Industrial Applications

- Welding
- Metalworking
- General Industrial Fabrication
