

Socket Flat Head Machine Screw

This socket flat head machine screw is manufactured with precision for machinery and industrial applications. It features a flat head design with a socket drive for secure fastening.

Product Overview

Precision Engineering for Industrial Assembly

This socket flat head machine screw is engineered for high-precision industrial applications, offering a reliable fastening solution for machinery and equipment. Designed with a flat head profile, it ensures a flush finish, making it ideal for surfaces where protrusion must be avoided. It is particularly well-suited for use in apparel and textile machinery, providing consistent performance and structural integrity.

Technical Details

Head Style	Flat Head
Drive Type	Socket

Applications

Recommended Industries	Apparel Machinery, Textile Equipment, General Industrial Machinery
------------------------	--

Features

Key Features

- Flush mounting design
- High-precision manufacturing
- Secure socket drive fastening
