

# Socket Garden Hoe with Sharpened Blade

This garden hoe features a durable steel construction and a socket to accommodate a handle. The blade is sharpened for effective cutting and digging during tilling, weeding, and soil cultivation.

## Product Overview

### Professional Socket Garden Hoe

This robust garden hoe is engineered for efficient soil cultivation, weeding, and tilling. Featuring a durable steel construction with a specialized socket design, it allows for secure handle attachment to withstand rigorous landscaping tasks. The sharpened blade edge ensures precise cutting and digging capabilities for professional gardening needs.

## Technical Specifications

### Key Features

- Socket-style handle attachment
- Sharpened blade edge
- Durable steel construction

### Country of Origin

China

### Available Model Numbers

H304, H305

### Material

Steel
