

Soft Coating Application Trowel

This trowel is designed for applying and smoothing soft coatings and finishes. Its flexible blade ensures precise control and even distribution of materials.

Product Overview

Precision Soft Coating Application

The Soft Coating Application Trowel is a specialized hand tool engineered for the precise application and smoothing of soft coatings and finishes. Featuring a durable, flexible rectangular blade, it allows professionals to achieve consistent distribution across various surfaces. The ergonomic handle is specifically designed to minimize hand fatigue, making it suitable for extended use in plastering and stucco projects.
