

Soft Material Application Trowel

This manual trowel is designed for applying and smoothing soft materials. It features a flat blade and ergonomic handle for precise control during use.

Product Overview

Professional Soft Material Application Tool

The Soft Material Application Trowel is a specialized manual tool engineered for precision application and smoothing of coatings, adhesives, and fillers. Featuring a corrosion-resistant rectangular blade and a protective frame, it ensures a smooth finish while preventing surface damage. Its ergonomic handle provides the control required for high-quality work in tiling, plastering, and flooring tasks.
