

Soft Material Trowel

This trowel is designed for applying and smoothing soft materials, such as grout, plaster, or thin-set mortar. It features a durable, ergonomic handle for comfortable grip and ensures precise control and even distribution of materials.

Product Overview

Professional Finishing Tool

The Soft Material Trowel is a specialized manual tool engineered for the precise application and smoothing of grout, plaster, and thin-set mortar. Designed with an ergonomic handle to minimize user fatigue during extended projects, this tool ensures consistent material distribution. The high-quality, non-stick base prevents material build-up and simplifies the cleaning process, making it an essential choice for both professional contractors and DIY enthusiasts.

Technical Features

Key Attributes

- Non-stick base material
- Ergonomic handle design
- Durable construction
- Reduces user fatigue

Applications

Tiling, Plastering, Grouting, Finishing

Performance Metrics

Operational Efficiency

100 %

Non-Stick Efficiency
