

Soil Analysis Sieve Set

This sieve set is designed for soil analysis and particle size determination. Constructed with a double layer of high-quality woven mesh, the sieves provide precise separation and consistent results.

Product Overview

Professional Soil Analysis Sieve Set

This soil analysis sieve set is engineered for precise particle size determination in both laboratory and field environments. Built with high-quality woven mesh, the sieves ensure accurate and repeatable separation results for diverse testing requirements. The set offers durability and reliable performance for professionals seeking consistent soil assessment data.

Technical Specifications

Aperture Sizes

- 0.075mm
- 0.1mm
- 0.25mm
- 0.5mm
- 1mm
- 2mm
- 5mm
- 10mm
- 20mm

Construction

Double Layer • High-Quality Woven Mesh

Available Diameters

200mm, 300mm, 400mm
