

Soil and Asphalt Plate Compactor

This plate compactor is designed for soil and asphalt compaction. It features a robust engine for reliable performance and a durable steel base plate for efficient compaction.

Overview

Professional Compaction Performance

This heavy-duty plate compactor is engineered to deliver superior surface smoothing and ground compaction through high-frequency vibration. Designed for versatility, it excels in trench compaction, earthworks, road maintenance, and landscaping projects. With a robust engine and durable steel base plate, this machine offers high efficiency and excellent forward capability, making it an ideal tool for compressing soil, asphalt, and gravel.

Technical Specifications

Model Identifier	C150T
Sound Power Level (LWA)	101 dB

Applications

Ideal Use Cases

- Trench compaction
- Earthworks
- Road maintenance
- Landscaping
- Brick paving (with rubber mat)
- Driveway topping

Suitable Materials	Soil, Asphalt, Gravel
--------------------	-----------------------

Design Features

Key Features

Foldable Handle • Durable Steel Base • High Compaction Force • Slope Climbing Capability
