Product Overview

Professional Compaction Solution

This robust plate compactor is engineered for high-performance soil and asphalt compaction in confined spaces. Featuring a durable steel base plate and a powerful engine, it delivers consistent force for demanding construction, landscaping, and road maintenance projects. The design prioritizes operator comfort and efficiency with integrated shock mounts, a water tank for dust suppression, and a foldable handle for easy transport.

Key Features

Operational Features

- Integrated water tank for dust suppression without external hose connection
- Foldable handle design for streamlined transportation and storage
- Built-in wheels for enhanced site mobility
- Fully sealed belt cover to protect internal components from debris
- Throttle control for precise speed management
- Heavy-duty shock mounts to reduce vibration transfer to the engine and handle

Engine Specifications

212 cc

Displacement

7 HP

Power Rating

Applications

Ideal Applications

Narrow Trenches, Curbs and Gutters, Around Tanks and Columns, Footings, Guard Railings, Drainage Ditches, Gas and Sewer Works, Building Construction

Compliance

Certifications & Standards

CE • EPA • ISO 9001
