Overview

Professional Soil Compaction Solution

This heavy-duty soil compaction plate is engineered for efficiency in confined areas, making it an essential tool for narrow trenches, curbs, and drainage work. It features a robust design with a built-in water tank for dust suppression and asphalt applications, ensuring versatile performance on granular soil. Designed for ease of use, the unit includes a foldable handle and built-in wheels for simple transport and storage.

Technical Specifications

Engine Displacement	212 cc
Power Rating	7 HP

Key Features

Operational Features

- Water tank for dust suppression and asphalt operation
- Foldable handle for compact storage
- Built-in wheels for easy maneuverability
- Throttle control for precise speed adjustment
- Heavy-duty shock mounts to reduce vibration

Protection & Durability

Sealed belt cover, Sand and soil protection, Heavy-duty construction

Applications

Recommended Applications

Narrow trenches • Curbs and gutters • Drainage ditches • Sewer works • Building construction • Foundation footings

Certifications

Compliance Standards

CE, EPA, ISO 9001
