

Soil Compaction Plate

This plate compactor is designed for high efficiency and delivers a big impact force. Its durable construction ensures a long lifetime.

Overview

Professional Soil Compaction Performance

This soil compaction plate is engineered for high-efficiency soil and asphalt compaction in construction, landscaping, and road maintenance applications. Powered by a robust 6.5 hp gasoline engine, it delivers consistent impact force to ensure stable ground preparation. Designed for maneuverability and durability, it features a user-friendly handle and versatile operation capabilities to meet demanding job site requirements.

Performance Metrics

Impact Force

21 kN

Impact Force

Max Compaction Depth	20 cm
Walking Speed	20-25 m/min
Climb Ability	0-20 degrees

Engine & Power

Engine Power	6.5 hp
Rotary Speed	5800 rpm

Physical Dimensions

Plate Dimensions	600 x 480 mm
