Product Overview

Professional Soil Compaction

This high-performance tamping rammer is engineered for superior compaction of clay, mixed, and granular soils. Designed with user comfort in mind, it features an advanced vibration-reduction system and an automatic throttle for effortless operation. Its robust construction and efficient filtration system minimize maintenance needs while ensuring long-term reliability on demanding construction sites.

Technical Specifications

Engine Model	Robin EH12 OHV
Engine Power	4 HP
Compatible Soils	Clay Soil, Mixed Soil, Granular Soil, Gravel, Asphalt

Key Features

Advanced Functionalities

- Automatic throttle control
- Shock absorber system for reduced handle vibration
- Secondary engine filtration for extended service life
- Integrated bone wheel for transportation
- Loading hook for easy site handling
