

Soil Compaction Rammer

This rammer is designed for compacting soil, gravel, and asphalt. It delivers high impact force for optimal compaction results.

Overview

Professional Soil Compaction Performance

The HCR80 is a robust and efficient rammer designed for compacting soil, gravel, and asphalt in construction and landscaping applications. Featuring a powerful engine, it delivers high impact force for optimal compaction results in demanding work environments. Its sturdy frame and ergonomic handle ensure comfortable operation and control, making it ideal for trenches, foundations, and other confined areas.

Performance

Performance Features

- High impact force for optimal compaction
- Powerful engine
- Durable construction for demanding environments

Suitable Applications

Soil, Gravel, Asphalt, Trenches, Foundations

Design & Ergonomics

Design Highlights

Sturdy Frame • Ergonomic Handle • Confined Area Ready

Operational Comfort

Yes
