Overview

Robust Soil Compaction Power

This high-performance tamping rammer is engineered for efficient consolidation of soil, gravel, and asphalt in demanding construction and landscaping environments. Featuring a powerful engine and a heavy-duty frame, it delivers exceptional impact force to ensure a solid foundation for trenches and site preparation. Its compact design facilitates easy maneuverability in confined spaces, making it a versatile and reliable choice for professional contractors.

Technical Specifications

Engine Power

4 HP

Rated Power

Engine Model

EH12 OHV

Applications & Usage

Primary Use Cases

- Trench compaction
- Foundation preparation
- Site landscaping
- General construction compaction

Suitable Materials

Soil, Gravel, Asphalt, Cohesive Soils, Granular Soils

Design Features

Key Design Features

Heavy-duty frame • Compact design • Comfortable grip handle • Durable ramming foot
