Overview

Professional Soil Compaction

This powerful tamping rammer is engineered for high-efficiency compaction of cohesive and mixed soils, granular materials, and asphalt. Its compact, ergonomic design allows for superior maneuverability in confined spaces such as trenches and along foundations. Featuring a heavy-duty frame and high-impact performance, this tool is designed to enhance site stability while reducing operator fatigue.

Performance

Operational Performance

80 RM-80

Model Capacity

Technical Specifications

Key Components

- Heavy-duty steel frame
- Shock-absorbing operator handle
- Protective engine cover
- Flexible bellows system
- High-impact compaction foot

Engine & Power

Gasoline powered engine (GX120 series)

Certifications

Compliance & Standards

CE Certified

Applications

Suitable Materials

Cohesive Soil, Granular Soil, Mixed Soil, Asphalt, Gravel
