Overview

Professional Soil Compaction

This high-performance soil compaction rammer is engineered for demanding construction and landscaping environments. Powered by a reliable gasoline engine, it eliminates the need for fuel-oil mixing while ensuring easy starting and efficient operation. Designed with operator comfort and durability in mind, the unit features a heavy-duty shock mount system to minimize hand-arm vibration and a robust protective frame to withstand tough job site conditions.

Engine & Performance

Engine Type	Gasoline
Operational Benefits	Easy Starting, Low Noise, Low Maintenance, Fuel Efficient

Design & Build

Vibration Control	Yes
Rammer Shoe Material	Steel plate with wooden insert
Engine Protection	Yes

Applications

Ideal Applications

- Trench work
- Backfilling
- Foundation preparation
- Soil compaction
- Gravel compaction
- Asphalt compaction
