

Soil Compactor

This soil compactor is a robust machine designed for soil compaction in construction and landscaping. It delivers optimal compaction force for achieving desired soil density.

Overview

Professional Grade Soil Compactor

The CNP30Y is a high-performance plate compactor engineered for demanding construction and landscaping environments. It delivers significant centrifugal force to ensure optimal soil density across granular soils, asphalt, and paving stones. With multiple engine options and a robust design, this machine balances power, efficiency, and operator control for reliable daily use.

Performance Metrics

Key Performance Indicators

30.5 kN

Centrifugal Force

50 cm

Compaction Depth

238 m²/hr

Efficiency

4810 vpm

Vibration Frequency

Engine Options

Engine Configurations

Engine Type	Power (kW/hp)	Weight (kg)
Honda GX270	6.6 (9.0)	165
Chinese Petrol	6.6 (9.0)	165
Chinese Diesel KM178F	4.4 (6.0)	185

Technical Details

Travel Speed	40 cm/s
Plate Size	72.5 x 45 cm

Logistics

Package Dimensions	80 x 51 x 125 cm
