

Soil Compactor

This soil compactor is a robust and efficient compaction tool designed for a variety of applications, including soil, asphalt, and granular materials. It delivers optimal compaction force for achieving desired density and stability.

Product Overview

Professional Compaction Performance

The MS50 Plate Compactor is a robust and efficient tool engineered for soil, asphalt, and granular material compaction. Designed for durability in demanding environments, it features a high-performance engine and a heavy-duty base plate to ensure optimal density and stability. The unit is built for versatility, making it an ideal solution for contractors, landscapers, and construction professionals who need reliable performance in confined spaces.

Key Features

Design & Construction

- Foldable handle for easy transportation and storage
- Open plate design provides self-cleaning capabilities
- Built-in wheel for effortless site mobility
- Heavy-duty shock mounts to reduce vibration
- Sealed belt cover to prevent sand and soil ingress
- Round edge design to protect exciter housing and surrounding objects

Optional Add-ons

Throttle Control

Standard Equipment

Lifting Hook
