Overview

Robust Soil Compactor

This heavy-duty plate compactor is engineered for efficient soil, gravel, and asphalt consolidation. Featuring a powerful 6.5HP 4-stroke engine, it delivers consistent high-frequency vibration through a durable steel base plate. Its design focuses on reliable performance for road construction, landscaping, and foundation preparation tasks.

Engine & Performance

Power Output

6.5 HP
Power

Engine Type	Air-cooled, single cylinder, 4-stroke
-------------	---------------------------------------

Technical Specifications

Centrifugal Force	15 KN
Compaction Depth (Soil)	30 cm

Physical Dimensions

Base Plate Dimensions (LxW)	54 x 44 cm
Shipping Dimensions (LxWxH)	79 x 52 x 69 cm
Shipping Weight	87 kg

Operational Features

Working Direction	Forward
Suitable Applications	Soil Compaction, Gravel Consolidation, Asphalt Paving, Landscaping, Road Construction
