

Soil Crushing and Culling Machine

This heavy-duty machine is designed for crushing and culling materials. It features hardened steel blades arranged in a rotary configuration for optimal pulverization and separation.

Product Overview

Heavy-Duty Soil Processing

This soil crushing and culling machine is engineered for high-efficiency soil preparation and material refinement. Featuring robust construction and hardened steel rotary blades, it ensures optimal pulverization and separation of materials. It is an ideal solution for both agricultural and industrial applications that demand thorough breakdown and consistent processing quality.

Technical Specifications

Blade Type

Hardened Steel • Rotary

Blade Configuration

Rotary configuration with hardened steel blades

Suitable Applications

Agricultural, Industrial, Soil Preparation, Material Processing

Machine Type

Crushing and Culling Machine
