

Solar and Hand Crank Powered Torch Flashlight

This compact device combines a torch and a flashlight into one portable unit. It features a solar panel for charging and a hand crank for manual power generation.

Product Overview

Versatile Emergency Lighting Solution

This portable solar and hand crank powered torch flashlight is designed for reliable, sustainable illumination in any environment. Combining dual power generation methods, it ensures you have access to light during emergencies, outdoor camping trips, or everyday tasks. Its compact design and dual-energy charging capabilities make it an essential tool for professional-grade emergency preparedness kits.

Technical Specifications
