

Solar Lighting Kit with 3 LED Bulbs and USB Charging

This solar lighting kit includes a solar panel, a power unit, and three LED bulbs. It is designed for off-grid applications, offering a reliable and eco-friendly alternative to traditional power.

Product Overview

Sustainable Off-Grid Lighting Solution

The solar lighting kit provides a versatile and eco-friendly illumination source designed for off-grid environments. Featuring a high-efficiency solar panel, a robust power storage unit, and three included LED bulbs, this system ensures reliable lighting for homes, camping, or emergency scenarios. The integrated power unit enhances utility by offering USB charging capabilities for mobile devices.
