

Solar Powered Air Purifier for Home Use

This compact air purifier is powered by solar energy for sustainable operation. It improves indoor air quality by filtering out dust, pollen, and other airborne particles.

Overview

Eco-Friendly Air Purification

The YQ-1090 is a compact, solar-powered air purifier designed to enhance indoor air quality in home environments. By utilizing integrated solar panels, it offers a sustainable and energy-efficient solution for filtering dust, pollen, and airborne particles. Its silent operation and small form factor make it an ideal choice for maintaining a healthy atmosphere in small living spaces.

Technical Specifications

Air Filtration Targets

- Dust
- Pollen
- Airborne particles
