

Solar Powered Barricade Light

This barricade light is designed for traffic control and safety. It features a yellow housing, amber lens, and solar panel for charging.

Product Overview

Professional Traffic Safety Lighting

This solar-powered barricade light is a high-visibility solution designed for traffic control and safety in demanding environments. Featuring durable construction with a yellow housing and amber lens, it is ideal for construction sites and road work zones. The integrated solar panel and rechargeable battery system ensure long-lasting, low-maintenance performance in various weather conditions.

Physical Characteristics

Housing Color	Yellow
Lens Color	Amber
Construction Features	High-Visibility, Weather-Resistant, Durable

Power & Operation

Power Source	Integrated Solar Panel
Battery System	Rechargeable Battery

Applications & Mounting

Primary Applications

- Construction sites
- Road work zones
- Traffic control
- Temporary lighting areas

Mounting Hardware Included	Yes
