

Solar Powered Bird and Animal Repeller

This solar-powered device repels birds and animals from gardens and yards. It combines ultrasonic sound waves, flashing LED lights, and a rotating spinner, activated by a motion sensor for targeted deterrence.

Product Overview

Effective Deterrent Solution

The HCX-K713 Solar Bird and Animal Repeller provides an eco-friendly and energy-efficient way to protect your property from unwanted visitors. Utilizing ultrasonic sound waves, this weatherproof device effectively deters pigeons, cats, dogs, rats, foxes, deer, and monkeys. Its motion-activated system ensures targeted protection for gardens and outdoor spaces without the need for complex wiring.
