Product Overview

Professional Outdoor Solar Lighting

This decorative solar-powered arm light is engineered for high-performance outdoor illumination, featuring a robust aluminum alloy body and warm white LED output. It utilizes advanced ALS 2.0 technology to guarantee reliable operation for up to 8 rainy days, even in challenging weather conditions. The integrated PIR motion sensor provides enhanced security, while the intelligent dawn-to-dusk automation ensures energy-efficient performance for residential and commercial spaces.

Technical Specifications

Overview of technical specifications including motion sensor range, color variants, and component structure.

Brightness

2000 lm
Lumen Output

190 lm/W
Efficiency

Ingress Protection

IP65 Waterproof

Autonomy

8 days

Advanced Features

Motion Detection

Feature	Specification
Detection Range	5-8 meters
Detection Angle	120 degrees

Maintenance Features

- Patent FAS damage identification
- 4 LED battery capacity indicators
- Remote control operation
- Auto dusk-to-dawn switching

Physical & Installation

Mounting Styles	Wall Mount, Arm Design
Available Colors	Black, Silver-grey, Silver
