

Solar Powered Deep Well Submersible Pump

This solar-powered pump is designed for deep well water extraction. It provides a sustainable and reliable solution for water supply in remote or off-grid locations, suitable for irrigation and domestic use.

Overview

Sustainable Water Solution

This high-performance solar-powered deep well submersible pump is engineered for efficient water extraction in remote or off-grid locations. By utilizing direct solar energy, the system provides a reliable and cost-effective alternative to grid-powered pumping. Constructed with durable materials, it ensures longevity and minimal maintenance for critical applications such as irrigation, livestock watering, and domestic supply.

Key Features

Included Components

- Submersible Pump
- Solar Panels

Suitable Applications

Irrigation, Livestock Watering, Domestic Water Supply, Off-grid Pumping

Performance

Build Quality

High-performance • Durable Construction
