

Solar Powered Emergency and Indicator Light

This solar-powered system provides emergency and indicator lighting. It is designed for outdoor use and features solar panels, a battery enclosure, and LED lights.

Product Overview

Self-Sustaining Emergency Lighting

This solar-powered emergency and indicator light system is engineered for reliable, off-grid performance in outdoor environments. By integrating high-efficiency solar panels with a secure battery storage enclosure, the unit operates independently of external power grids. It is an ideal solution for remote locations or areas requiring consistent illumination during power outages and emergency situations.

Technical Specifications

Power Source	Solar Energy
Lighting Technology	LED
Installation Type	Pole Mounted

Key Features

System Advantages

- Self-contained energy harvesting
- Energy-efficient LED illumination
- Weather-protected battery enclosure
- Reliable operation during power outages

Best For	Outdoor Use, Remote Locations, Emergency Lighting, Off-Grid
