

Solar-Powered Garden Pathway Light

This solar-powered garden pathway light provides an energy-efficient lighting solution for outdoor spaces. It features a built-in solar panel that charges during the day and automatically illuminates at night.

Product Overview

Sustainable Outdoor Lighting

This solar-powered garden pathway light offers a highly energy-efficient solution for illuminating gardens, lawns, and walkways. Designed for seamless performance, it features an integrated solar panel that automatically charges throughout the day and activates at dusk. Its durable, weather-resistant construction ensures reliable, year-round operation in various outdoor environments, providing both safety and a beautiful ambient glow to any landscape.

Technical Specifications

Power Source	Solar Energy
Operation Mode	Automatic (Dusk-to-Dawn)
Durability Features	Weather-resistant, Outdoor-grade

Installation

Mounting Style	Ground Stake
Installation Complexity	Tool-free, easy ground insertion

Application

Recommended Use Cases

- Garden pathways
- Lawns
- Outdoor landscape accent lighting
- Safety path illumination
