

Solar Powered Garden Sphere Light

This solar-powered light is designed for illuminating gardens and lawns. It features a spherical, frosted white light diffuser and a black base with a ground stake for easy installation.

Product Overview

Solar Powered Garden Sphere Light

This solar-powered garden sphere light provides an efficient and elegant lighting solution for outdoor landscapes. Featuring a dual-LED design with both white and color-changing options, it automatically activates at dusk to illuminate pathways and gardens. Built with weather-resistant materials and a high-efficiency solar cell, this light ensures reliable performance through the night with a simple, stake-based installation.
