

Solar Powered Keyring Torch

This compact keyring torch is powered by solar energy. It features a built-in solar panel for recharging and provides bright LED illumination.

Product Overview

Compact Eco-Friendly Lighting

The S-210 Solar Keyring Torch is a compact and efficient lighting solution designed for modern professionals on the go. By integrating a built-in solar panel, this device eliminates the need for disposable batteries, offering a truly sustainable way to maintain everyday carry essentials. Its durable construction ensures reliable performance, while the high-output LED provides clear illumination for a variety of tasks.
