

Solar Powered Lawn Light

This solar lawn light uses solar energy as its power source. It automatically controls work according to the ambient light and features a corrosion-resistant body.

Product Overview

Solar Powered Lawn Illumination

The XNY-TC-03 is a robust solar-powered lighting solution designed for professional outdoor applications. It features high-brightness LED technology that offers excellent energy efficiency and long service life. Its corrosion-resistant construction and automatic light-sensing controls ensure reliable, low-maintenance performance for gardens and pathways.

Technical Specifications

Model Number	XNY-TC-03
Power Source	Solar Energy
Light Source	High Brightness LED
Control	Automatic light sensing

Features

Recommended Use

- Lawn lighting
- Garden paths
- Outdoor landscape illumination

Key Features	Corrosion Resistant, Weatherproof, Automatic Control, Energy Efficient, Long Life Span
