

Solar Powered LED Dome Light

This product is a dome-shaped LED light powered by solar energy. It features a ribbed upper section for light diffusion and a dark base with ventilation.

Product Overview

Solar Powered LED Dome Light

This Solar Powered LED Dome Light is designed for versatile outdoor illumination, making it an ideal choice for decorative or safety lighting applications. Featuring a durable, dome-shaped construction, the unit incorporates a solar panel on the top for efficient, self-sustaining charging. Its clear, ribbed upper section is engineered to provide soft, diffused light, while the robust base includes ventilation to ensure long-lasting performance in various outdoor settings.

Technical Specifications

Application Suitability

Outdoor Lighting • Decorative • Safety Lighting • Aquatic Environments

Power Source	Solar Energy
Lighting Technology	LED
Design Features	Dome Shape, Ribbed Diffuser, Integrated Solar Panel, Ventilated Base
