

Solar Powered LED Flashlight

Compact flashlights are powered by integrated solar panels. These flashlights offer a sustainable lighting solution, eliminating the need for batteries.

Product Overview

Sustainable Lighting Solution

This compact and eco-friendly solar-powered LED flashlight provides a reliable, battery-free lighting solution for various environments. Designed for durability and convenience, it features an integrated solar panel that harnesses sunlight for recharging, making it an excellent choice for camping, emergency preparedness, or everyday carry. Its robust plastic construction ensures longevity in demanding conditions.

Technical Specifications

Power Source	Integrated Solar Panel
Light Technology	LED
Housing Material	Durable Plastic

Features

Ideal Applications

- Camping
- Emergency Preparedness
- Everyday Use

Available Colors

Assorted

Key Features

Solar Powered, Battery-Free, Compact Design, Durable Housing
