Product Overview

Sustainable Outdoor Lighting

This solar-powered LED garden light offers a highly efficient and energy-saving solution for illuminating outdoor landscapes. Designed for durability and weather resistance, it features an integrated solar panel that automatically charges throughout the day. With no wiring required, installation is simple, making it ideal for pathways, gardens, and general outdoor decoration.

Technical Specifications

Power Type	Solar Energy
Lighting Source	LED
Operation Mode	Automatic dusk-to-dawn activation

Features & Benefits

Key Features

- High efficiency energy saving
- Weather-resistant construction
- Tool-free wireless installation
- Ribbed diffuser for wide-angle output

Usage Environment	Outdoor, Garden, Pathways, Landscape
