

Solar Powered LED Garden Stake Light

This LED solar garden light features an integrated solar panel for automatic charging. Its adjustable head and stake design allow for directional lighting and easy installation in gardens and lawns.

Product Overview

Solar Powered LED Garden Stake Light

This solar-powered garden light offers a versatile and eco-friendly lighting solution for outdoor spaces. Designed with durable, weather-resistant ABS material, it provides reliable performance against aging and rust. With a high-capacity battery and efficient polysilicon solar panel, it ensures bright illumination for up to 10 hours on a single charge.

Technical Specifications

Light Source Power

- 4W
- 7W

Battery Voltage	3.7 V
-----------------	-------

Battery Capacity	1800 mAh
------------------	----------

Minimum Charging Time	6 H
-----------------------	-----

Performance Metrics

Key Performance Metrics
